BUILDING SOLUTIONS BRISBANE

Building Solutions is a specialist contractor who provide the best in building contracting services throughout Brisbane. Our team has considerable experience and we strive to offer only the highest in quality and expertise in the work that we complete. We pride ourselves on high safety standards and can guarantee client satisfaction by using our wealth of experience and highly trained staff to complete any project needed.

RECENT DEVELOPMENTS

So far in 2014, Building Solutions has really exceeded expectations by completing challenging new projects and extending our services to cater for projects requiring Marine works. B.S.B was recently appointed the QuakeWrap systems agency for S.E QLD and completed Australia's first major PileMedic project on the iconic Riverwalk at Kangaroo Point for Brisbane City Council. In June we also had the privilege of Professor Mo Ehsani of QuakeWrap and Ali Habibi (QuakeWrap Australia) visiting Brisbane and hosting seminars for major clients TMR, BCC and Consulting Engineers. Adding internationally recognised products such as QuakeWrap to our services and the work we have completed really shows our diversity and commitment to cater for the changing needs of our clients. We are succeeding to continually fulfil our ultimate goal which is to satisfy clients by completing projects safely, on time and with within budget.

NEW PRODUCTS

PileMedic™: The Permanent Solution for Pile Restoration

Over the last three decades, many solutions and products for encasement and repair of piles have been introduced. These products lack a scientific approach to solving the problem. As a result, numerous shortcomings exist with the pile repair systems that have been offered to date.

PileMedic™ is a patent-pending product developed by Professor Mo Ehsani following 20 years of research and development. It is the most economical and the fastest system for strengthening columns, underwater piles, utility poles, and bridge piling with little disruption to traffic. The unique engineering features of this product resulted in the US Army Corps of Engineers and FEMA's Urban Search & Rescue Program singling out PileMedic™ as the only system for fast repair of columns and piles that are damaged in a disaster such as hurricane, earthquake, terrorism, etc. Building Solutions Brisbane is the certified agent and installer for all QuakeWrap products in South East Queensland.
