Mr Michael Slater
Building Solutions Brisbane**To whom it may concern**

Over the past 2 years, Building solutions have completed a number of different and complex remedial works at the BP refinery in Brisbane. Ranging from vessel support rectification works, to fireproofing repairs, to cooling water basin wall replacements they have proposed and executed solutions of the highest quality.

At certain times they were faced with difficult situations, but to their credit the team was open and honest about the situation which meant any issues could be rectified immediately. Additionally they did everything they could to better their processes and procedures to ensure the learning's were captured for future projects.

Working in a Major Hazardous facility, the team was capable of meeting and exceeding the safety requirements to ensure the safety of all their workers, and others around them.

Over the 2 years, Building Solutions Brisbane definitely grew as a company and I would recommend that they are considered for any of the services that they offer.

Regards
