Hardstands Before

Hardstands After

CONCRETE SOLUTIONS

With regard to our surfacing application, we utilise a variety of products chosen on the basis of their strength, cost durability and aesthetic appeal.

- New concrete hardstands
- Repairs to existing hardstands
- Joint remedials
- Slab sealing and water ingress
- Machine bases and plinths
- Holding down bolt installation
- Concrete rehabilitation

GROUTING SOLUTIONS

- Cementitious Grout
- Epoxy Grout
- Machine and Compressor bases
- Pumping and Placing
- Precision Grouting
- Hardstand Stabilization
- Cavity Filling of Voids
- Slab Jacking
- Crack Injection

We have a variety of specialist pumps available to do both epoxy "ultra high strength" and cementitious grouts "class A & C applications". We have vast knowledge in this area and have solved some complicated problems in high loading areas.

APPLICATIONS INCLUDE:

Bridge decks, machine bases, compressor bases, holding down bolts, bridge bearings, culvert arches, under hardstand stabilising, marine structures and remedial engineered solutions for damaged structures.

ASBESTOS & HAZARDOUS SOLUTIONS

- Asbestos identification, removal and disposal. (Friable and Non Friable)

We are able to undertake large asbestos removal projects that are considered friable and bonded material and are able to arrange air monitoring and testing where required. Building Solutions Brisbane specialise in industrial applications and have a class 'A' friable license.

Before: Unprotected

After: Fireproofed

PASSIVE FIREPROOFING SOLUTIONS

- Intumescent Epoxy Fire Proofing systems for structural steel
- Vermiculite / Fendolite lightweight cement based systems
- Electrical cable and duct PFP systems

Our company has the capacity to spray passive fireproofing products to various structures and vessels. The fire proof rating can be varied to suit our client's requirements and specifications.
