To whom it may concern,

Building Solutions Brisbane assisted with the extensive refurbishment of the Pacific Hotel in Brisbane. The older 10 storey building with a few basement carparking levels provided a number of construction challenges, which Duane and his team embraced and managed with little fuss. BSB where able to manage their work and teams around the challenges of an occupied building. The scope of works included the full refurbishment of the hotel rooms and corridors which include upgrading of essential services. BSB where also responsible for the upgrade of the reception area and pool deck.

They were able to deliver the stages on time and budget with minimal disruption to the hotel operations. We would have no hesitation to recommend Building Solutions Brisbane to assist with any building project.

Yours sincerely,
